RD2014-2435

12 - Feb

Dear Dr. Dulangon,

We are pleased to introduce to you **Voyager Adventure** a unique educational entertainment program designed as an alternative solution to provide the students interactive learning experience in the field of Science and Mathematics. Using a state-of-the-art **Digital Planetarium**, "**Voyager Adventure**" promises to bring out action-packed activities, loaded with amazing knowledge and information that could potentially be a life-changing experience for everyone.

Every **Voyager Adventure** is meant to entertain at the same time teach a subject matter that has a global and universal impact to all.

Voyager Adventure: Bringing the Universe Closer is the first program that promotes **Astronomy**. It gives valuable, deeper understanding and appreciation of the universe and hopefully inspires the students to pursue their dreams of becoming Astronomers one day. The students are given the opportunity to manipulate advance telescopes to gaze the stars and other heavenly bodies for further learning enrichment. Having been brought to more than two hundred schools in Mindanao area alone, the students responded amazingly and the feedback is very positive they demand more of the "**Voyager Adventure**" to make a comeback.

The adventure continues with **Voyager Adventure: Ocean and Beyond**, a new exciting program that promises the students a journey into the marvels of the sea. The **Digital Planetarium** becomes an **Aquarium** that transports the students into the bottom of the ocean understanding the symbiosis of human existence and that of marine life. The side effects of harmful human activities are shown in graphic presentation so it will touch the hearts of many and convince them that recycling and conservation is to be carried out seriously. Furthermore, the program now incorporates a **Disaster Awareness campaign**, to arm and equip the students with knowledge on calamities and how to cope with natural disasters that plague our country. They also exercise practical skills by learning to build a basic survival kit using recycled materials.

There will be more adventures to be created for more learning enrichment with relevance and social advocacy as **Voyager Educational and Entertainment Services** commits itself to be a provider and partner of every school throughout the Philippines in bringing out alternative programs to enhance learning potential. This I believe is in line with your vision and mission to bring change into the country's educational system. Recognizing and endorsing **Voyager Educational and Event Services** as partner in your commitment to provide the schools better technological tools will be both beneficial in our common goals not only to improve the students Basic Communication Skills: listening, speaking, reading, writing and viewing but also raising social awareness on the current issues of climate change.

Through your office, **Voyager Adventure** would like to visit schools by providing additional Science resources and different learning experiences for students using their creative imagination without having them leave the school premises. A lined up of activities can be launch at any school giving the students a fun ride into the ocean and beyond.

Please give us a chance to conduct our programs and to bring **Voyager Adventure** into the most far-flung rural areas in Mindanao setting aside the fear of lawlessness in the countryside. Our dedicated team believes that these students should be given an equal opportunity as well.

Let us join hands together as we journey with **VOYAGER ADVENTURE!**

Sincerely yours,

Sayreville O. Harris
President and CEO

**POLICY GUIDELINES ON REGULATING THE ISSUANCE OF
DEPED ADVISORIES**

Introduction

The Department of Education (DepEd) adopts a strategy of partnership with local, national, international public and private stakeholders through various programs, projects or activities.

Rationale

This Department has been receiving numerous requests from various organizations for the issuance of DepEd Advisories (DAs) to announce the conduct of their programs, projects or activities. In recognition of the contribution of these entities in the professional development of field personnel and in enriching teaching and learning through alternative learning experiences, the Department, in most instances, favorably responds to the requests, by issuing a DepEd Advisory.

However, complaints against some of these entities have reached this Department. Some participants, teachers and students and co-partners have filed their complaints against the sponsoring organizations due to unsatisfactory conduct of their activities, advance collection of registration fees from the prospective participants, but there was no actual conduct of the announced activity/event. Moreover, some companies, associations, organizations, institutions or agencies have used the DepEd's official name, seal and logo in their programs, projects, or activities (PPAs) without officially securing approval from the Secretary or his authorized executive official.

Objectives

The formulation and issuance of these policy guidelines will regulate the issuance of DepEd Advisories requested by local, national and international partner companies, associations, organizations, institutions or agencies. These regulations will set/define clearly the requirements in the issuance of DepEd Advisories. Adherence to these guidelines will promote a healthy partnership and protect the best interests of DepEd's constituents and the general public.

Policy Guidelines

1. This Department shall issue advisories only for the activities categorized below.

Category	Activity
A	Training programs, seminars, workshops, conferences, or advocacy campaigns, celebration, awarding ceremonies and other similar special events
B	Sponsored film showing, stage plays and other activities of similar nature
C	Scholarships/study grants, students exchange programs and other activities of similar nature
D	Tests administration, admission tests, or career assessments and other activities of similar nature
E	Contests, competitions, searches, fun runs and other activities of similar nature
F	Additional information (addendum), change of information (corrigendum) to previously approved DepEd Memorandum (DM)

Voyager

The Ocean and Beyond

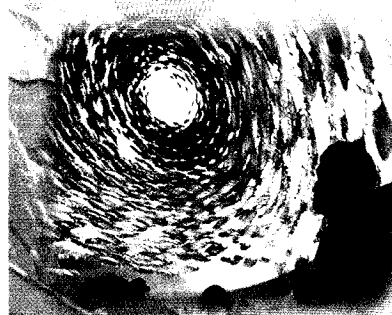

**VOYAGER ADVENTURES
BRINGS YOU TO "OCEAN
AND BEYOND." AN
ENTERTAINING AND
INFORMATIVE PROGRAM
THAT CHALLENGES THE
STUDENTS ON THE CURRENT
GLOBAL ISSUES THE WHOLE
WORLD IS FACING.**

KALUOKAHINA THE ENCHANTED REEF

A humorous adventure story for young and young-at-heart. This movie in our MOBILE DIGITAL AQUARIUM, brings the students to an exciting journey into the deep ocean and experience the life beneath the seas. With many informative details about the fantastic world under water, both thrilling and educational the film sharpens their awareness to preserve the environment.

FILM SHOWING

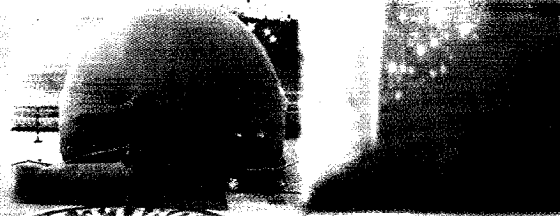

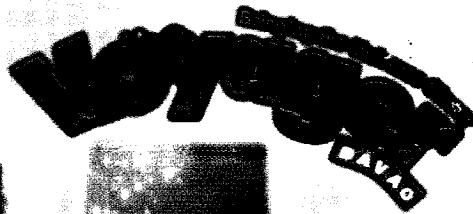

"CORAL REEFS" a film to view lets you enter into a surreal and spectacular world of an underwater Garden of Eden. Travel beneath the waves of the Indian Ocean to an ancient coral reef that is home to some of the strangest and most stunning creatures on earth.

INTERACTIVE FORUM

Learn about these issues: pollution, acidification, overfishing, global warming, etc. - and the possible solutions for protecting the ocean. Join in our discussions as we identify these human activities that threaten our ecosystem. Let us think of possible ways to save The Reefs.

**Voyager Adventures
Program of Activities**

DIGITAL MOBILE PLANETARIUM

A planetarium is a special place to study the sky. It uses lights projected onto the walls of a dome to simulate the stars, moon, planets, and other interesting space objects. Voyager Adventures manufactures its own digital planetarium. The first in South East Asia – called the Voyager Planetarium

Using the latest in digital technology, Voyager Adventures also features full dome educational movies ranging from tours under the sea to space travels within the Solar System. The equipment used in the program are designed to be mobile and can be brought to schools, thus keeping the students entertained without them leaving the security of school premises.

SPACE PHOTO EXHIBIT

Voyager Adventures has forged partnerships with various Educational Public Outreach (EPO) programs of scientific agencies. These partnerships gave fruit to the Voyager's Photo Exhibit. One of them is the National Radio Astronomy Observatory (NRAO) of National Science Foundation in Atacama, Chile. This is the organization behind several observatories in the South, such as Very Large Telescope (optical telescope) and Very Large Array (radio telescope). NRAO happily contributes photographs and exhibits for educational entertainment.

SOLAR OBSERVATION

Solar Viewing using the latest Solarmax Coronado PSE. 40

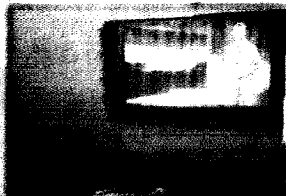

STAR GAZING

Stargazing using the latest model of telescope Celestron Nexstar 8SE with different television attachment to allow perfect viewing.

A state-of-the-art telescope with GPS, Camera and Automated Star Finding capabilities. These activities will be participated and interacted by the students themselves and teachers.

FILM VIEWING STATION

Enjoy and learn from the latest films featuring videos from JPL, IYA and NASA
