Attention: Ms. Rosanna U. Godinez  
Biodiversity Coordinator

Dear Dr. Monisit,

We are pleased to inform you that Phase II of the Biodiversity Reserve Development project which started in September, 2013 will be adding two more recipient schools. Attached are two letters addressed to the principals of the recommended schools, Buanoy NHS and the Aguho Elementary School.

These schools were supposed to be with the year three batch but could not join the rest due to the delayed funding from RAFI. The main reason why these schools are recommended is the presence of trained teacher and principal (Roberto Sabalande of Buanoy NHS and Amor Banares, principal of Aguho Elementary School) in these schools who have shown passion for biodiversity in past project implementation. We are confident that these teacher/principal will implement the project successfully even with a late start. Their project time line will be accommodated due to the late project start up.

As soon as we have your official approval of the above recommendation, we will send the attached letters to the concerned schools. The SWCF project coordinator, Ms. Weng Oyangoren will visit the schools to give Ms. Banares and Mr. Sabalande more detailed instructions. Do not hesitate to call our office (tel. no. 255 1402, 412 1609) if you have questions regarding the above recommendation.

Yours truly,

William G. Granert

Executive Director
