DR. RHEA MAR A. ANGTUD
Schools Division Superintendent
Department of Education – CEBU Province
Sudion, Lahug, Cebu City

Subject : *Fight for Nature, Fight for the Future: A Climate Change Caravan*

Dear Dr. Angtud:

We write on behalf of **SciMath Interactives** to respectfully request permission on the conduct of Climate Change Caravan in public and private schools in Cebu Province.

SciMath Interactives is an education solutions provider based in Metro Manila whose primary objective is to launch and operate interactive events and exhibition that will complement traditional classroom-based learning all over the Philippines.

It intends to engage in an interactive travelling exhibit, which will popularize the issue of climate change and disaster management among students and educators. The exhibit, entitled *Fight for Nature, Fight for the Future – A Climate Change Caravan*, aims to bring awareness and inspire commitment of the audience in tackling this highly topical issue.

By applying the technology used by planetariums to simulate the splendor of the outer space, the climate change caravan will showcase the beauty of the earth and the cause and effect of global warming and other related issues. To inspire active participation, we are incorporating other immersive and interactive activities and lectures that promote environment protection and disaster preparedness.

We are enclosing a brief concept paper on the climate change caravan. Should you wish to know more about the program, we would be glad to schedule a meeting with you or your representative. Please feel free to get in touch with our authorized Marketing Representatives in Region VII headed by the Alpha King Marketing Group with the following contact details:

Contact Numbers: 0918.444.9993 (Smart)/ 0917.772.9993 (Globe)
Email Address: alphaking.ph@gmail.com

In this regard, we would like to respectfully request permission to conduct our Climate Change Caravan in public and private schools in Cebu Province.

Very truly yours,

AIRNE C. TERRY
Chief Marketing Officer

Alpha King
VENTURES

*Dr. Montala,
Pls comment on this
Thank
N*

EXHIBIT TITLE: Fight for Nature, Fight for the Future – A Climate Change Caravan

PROGRAM BRIEF

Disaster resilience is a challenge that spans sectors. So, too, must solutions be. ***Fight for Nature, Fight for the Future*** is a travelling exhibit that features interactive visualization and activities for participants to gain a better understanding of the causes and consequences of climate change. The event will engage participants to think creatively about their role in tackling climate change-related issues and how they can adequately prepare for its adverse effects.

The exhibit is offered to all students and educators in pre-school, elementary, secondary and tertiary levels.

EXHIBIT ACTIVITIES:

Poster Making Contest

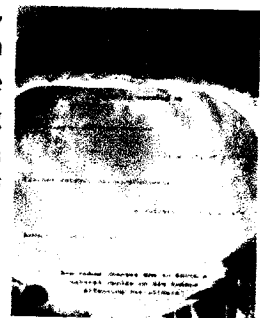

EARTHSAVERS'
MOVEMENT

The competition aims to be a venue for participants to use their creativity and artistic skills in expressing their perceptions on climate change. The entries will be displayed during the event and winning pieces will be recognized and given special award at the end of the exhibit. The winning pieces will also have the chance to be included in select ***Earth Savers' Movement*** exhibits. Earth Savers' Movement is a non-profit, non-government organization whose goal is to create environment awareness through proactive and practical approach in saving planet earth such as theatre and multimedia interview. Earth Savers' has been honored as *UNESCO Artist for Peace* because of its highly relevant initiatives in promoting peace, social justice and environmental protection.

Full-Dome Film Showing

Using immersive film technology akin to planetarium, the show will educate and entertain participants on how our planet's climate is changing. Participants are plunged into a spectacular environment recreating landscapes and virtual scenes. From the examination of meteorological phenomena to the exploration of large natural spaces and weather conditions, the show provides an extraordinary experience in learning highly topical and transcendent issues.

Interaction and Involvement Lecture

We have developed modules on the science of climate change that will encourage involvement and inspire commitment of different age groups in the fight for nature, fight for the future.

☐ **Disaster Management Training**

We are offering basic training modules on what to do before, during and after natural disasters. The modules are structured to encourage participation on mock scenarios before, during and after a calamity.

☐ **Isang Litrong Liwanag (Liter of Light)**

We have partnered with **My Shelter Foundation** to demonstrate how to turn waste plastic bottles into solar bulbs and/or making solar lamps. *Liter of Light* is a sustainable lighting project which aims to bring the eco-friendly solar bottle bulb to homes and communities around the world. It is the proud recipient of the *2015 Zayed Future Energy Prize* and a winner of the *2014-2015 World Habitat Award*.

We have partnered with My Shelter Foundation to demonstrate how to turn waste plastic bottles into solar bulbs and how to make solar lamps. Liter of Light is a sustainable lighting project, which aims to bring the eco-friendly solar bottle bulb to homes and communities around the world.

LITER OF LIGHT

"We are at the very edge of our capacity for sustainable development. The wholesale destruction of our natural habitats has gone on daily through the decades, with the inexorable, almost invisible, rapid process of ecological decay with our excessive carbon accumulation. All campaign on this issue, including the initiative of SciMath Interactives on Climate Change, should therefore be supported and integrated into one overarching mission for the nation. It is a dynamic example of fighting poverty through an integrated, interdisciplinary, inclusive and transformative lifelong learning in building a mindset for cutting carbon footprints, disaster risk reduction and building community resilience."

– **Hon. Heherson T. Alvarez**, Former Senator of the Republic of the Philippines | Former Commissioner, Climate Change Commission, Environmentalist | Human Rights Advocate

"There is no such thing as 'too much, too soon' when it comes to taking action for climate justice. No matter how small the act, the ripples it creates lead to seismic changes in attitude and mind set. I join SciMath Interactives to reach a wider audience to work and advocate for climate justice."

– **Jules Guiang**, TV Host | Youth Leader | YSEALI Fellow | United Nations Change Makers Network Ambassador

"Women have been neglected as efficient agents in climate change mitigation and adaptation. Admittedly, because of eco socio and political realities, their participation has been compromised. By promoting inclusive growth and involving them in Climate Change campaign, as what SciMath Interactive does, we open doors for them to work for a better Earth"

– **Candice Ramos**, Ms. Earth EcoTourism 2012 | Y-Peer Educator | Travel Show Host
